ALTERNATIVE THERAPIES

IN HEALTH AND MEDICINE

With its focus on original research, *ATHM* offers a comprehensive evaluation of the efficacy of natural therapies and remedies for many common disorders and conditions. Each issue features original research, case studies, and editorials by CAM-thought leaders and up-and-coming researchers, as well as an interview with a pioneer in the CAM field.

Published continuously since 1995, *Alternative Therapies* is the leading journal for physicians

and practitioners interested in helping their patients through the latest research on practical uses of alternative and natural therapies.

Alternative Therapies' goal is to help practitioners take a rational, individualized, comprehensive approach to treatment. As patient interest in a more holistic, multimodality approach to health care grows at an exponential rate, *Alternative Therapies* becomes an increasingly valuable tool for MDs, DOs, RNs, NPs, and PhDs.

Practitioner readers of *Alternative Therapies* work with numerous patients. Your marketing campaign reaches both the practitioners in this growing field and, through them, the large number of patients they treat.

Alternative Therapies in Health and Medicine is indexed in MEDLINE, Index Medicus, CINAHL, SciSearch, ISI Alerting Services, Current Content/Clinical Medicine, and EMBASE.

IMCJ provides clinicians and other health care providers with application-based therapies and protocols gleaned from the latest research and theoretical thinking in integrative medicine. Each issue includes original research, industry insights, guest editorials from leading CAM professionals, and more.

Integrative Medicine is the most highly regarded

source for practical and research-based information in the exploding complementary and alternative medicine (CAM) field.

Integrative Medicine is one of the only peer-reviewed journals focused on helping practitioners use both conventional and natural medicine for the most effective therapies.

Each issue of *Integrative Medicine* features both hands-on advice for how to run a successful practice and the latest research to help practitioners keep up with the many new developments in patient care. Readers include holistic MDs, naturopaths, homeopaths, integrative chiropractors, nutritionists, and acupuncturists. *Integrative Medicine* readers don't just recommend products to their patients; in many cases, they also sell them. Research shows that it is not uncommon for a single practitioner to sell tens (and sometimes hundreds) of thousands of dollars of products to their patients.
